Gentlemen:

[REDACTED] is pleased to submit the list of Special Test Equipment acquired under the subject contract as well as a list of the Residual Material developed in the performance of this contract. Enclosure a) itemizes all of the Special Test Equipment while Enclosure b) shows the Residual Material which consists of a breadboard Contact Printer, breadboard High Resolution Image System and breadboard Low Resolution System. The latter would appear to have little or no value since their operation is dependent upon other electronic equipment obtained from the Contractor's Capital Equipment Pool.

[REDACTED] desires to purchase the Special Test Equipment as shown in Enclosure a). Therefore, as provided in Section 2, Article 19, paragraph (1) of the Basic Agreement, we hereby offer [REDACTED]. It should be noted that these items marked with an asterisk on the schedule are part of the breadboard Electronic Processor (Contact Printer) and in the event the Government should wish to have this
